

STRIVE TO DELIVER EXCELLENCE.

# Custom Synthesis of Peptides, Synthesis

OUR COLLABORATION WILL LEAD TO SUCCESS.

## 1 Our Introduction

TechnoConcept is a conglomerate of start-ups specializing in complex chemistries, with the ability to synthesize both regular and intricate reagents and peptides to a high degree of skill.

## 2 Regular and Catalogue Peptides

We can provide regular peptides with the desired modifications and conjugation, which can be used for Antibody production, biological assays, and structure-function analysis etc.

## 3 Scale of Synthesis

Our team is equipped to handle synthesis scales varying from milligrams to grams, and in some instances, up to kilograms. Furthermore, our associates are proficient in delivering GMP facility production, complete with regulatory certifications.

## 4 Research Projects

The business model provides contract research services through Full Time Assistance (FTA), enabling clients to achieve their research objectives. We make sure, you experience an amazing research experience with us.

## 5 Our Expertise where we excel

Branched peptides, Conformationally constrained cyclic peptides, Cysteine-rich peptides, Toxins, Cyclic thioethers, Cyclic peptides by click chemistry, stapling and RCM, Labelled peptides, Derivatized peptides, Peptoids and Peptidomimetics.

## 6 More Expertise

Non-natural amino acid, purification and MS/MS of peptide, peptide impurity identification, Bioorthogonal reaction peptide therapeutic design, peptide-chelators, AND Pegylated peptides.

## 7 What we need from you

Acquiring Custom or Regular Peptides  
In order to obtain a comprehensive quote with an estimated delivery timeline, kindly provide the desired peptide sequence, quantity, and purity specifications.

## 8 Enjoy peptide research with us

To initiate research projects, we require a full write-up and a handful of email correspondences to iron out any details. We also offer the option to sign an NDA for research purposes.
